DRINKING WATER INSPECTORATE

WATER ACT 2003

LIST OF WATER TREATMENT WORKS IN ENGLAND AND WALES

March 2006

WATER TREATMENT WORKS IN ENGLAND AND WALES

1 Introduction

- 1.1 The Water Industry Act 1991 (the Act), as amended by Water Act 2003, allows a company that is the holder of a Water Supply Licence to have access to a water undertaker's¹ supply system in order to supply water to a customer's eligible premises.
- 1.2 Section 17B(5) of the Act defines a water undertaker's supply system for the purposes of the new licensing arrangements. Part of this definition includes any water mains and other pipes, which are the water undertaker's duty to develop and maintain by virtue of section 37 of the Act, and which are used for the purpose of conveying water from the undertaker's treatment works to the premises of customers. The reference to treatment works applies to works designated from time to time by the Secretary of State, following consultation with the National Assembly for Wales, for the purposes of supplying drinking (potable) water.
- 1.3 The Secretary of State shall then publish from time to time a list of works so designated.

2 Designation of a treatment works

- 2.1 The Drinking Water Inspectorate, acting by authority of the Secretary of State, considers a treatment works for the purposes of the above designation to be the treatment chain from the point of abstraction (or other first treatment point) up to, and including, the final critical process control point. The term 'treatment works' therefore applies not only to a geographically delineated site, but to the full treatment chain.
- 2.2 The final critical process control point is before any consumers are supplied. Any secondary disinfection applied in the distribution chain is not part of the treatment chain and, by definition, is not part of the treatment works.
- 2.3 The Inspectorate's guidance² on Water Supply (Water Quality) Regulations³, as amended, requires the compliance sample point at a water treatment works to be

¹ See section 5 and Schedule 1 of the Interpretation Act 1978 as to the meaning of 'water undertaker'

² Guidance on the Water Supply (Water Quality) Regulations 2000 (England) and the Water Supply (Water Quality) Regulations 2001 (Wales), Drinking Water Inspectorate, May 2005

³ The Water Supply (Water Quality) Regulations 2000, which apply in relation to the supply of water using the supply system of any water undertaker whose area is wholly or mainly in England, and the Water Supply (Water Quality) Regulations 2001, as amended, which apply in relation to the supply of water using the supply system of any water undertaker whose area is wholly or mainly in Wales.

representative of the water leaving the works. As such, this may be used to identify the downstream boundary of a treatment works.

2.4 Some water treatment works may include a separate treatment stream for supplying partially treated water for industrial use. The potable supply system would still commence downstream of the final critical process control point, whereas the non-potable supply system would commence downstream of appropriate backflow prevention on the outlet main conveying the industrial supply.

3 The Secretary of State's List

3.1 The first list of designated treatment works is attached in Annex 1. It is based on the new Consumer Council for Water regions, and comprises the dedicated compliance sample point reference codes for each water treatment works within that region. A list of the water companies in each region is given below.

Consumer Council for Water region	Water companies represented
Northern	Hartlepool Water Northumbrian Water United Utilities Water Yorkshire Water
Western	Bournemouth & West Hampshire Water Bristol Water Cholderton & District Water South West Water Wessex Water
Central	Severn Trent Water South Staffordshire Water
Eastern	Anglian Water Cambridge Water Essex & Suffolk Water Tendring Hundred Water
Southern	Folkestone & Dover Water Mid Kent Water Portsmouth Water Southern Water South East Water

Thames	Sutton & East Surrey Water Thames Water Three Valleys Water
Wales	Albion Water Dee Valley Water Dŵr Cymru

- 3.2 Water undertakers are required to submit information to the Drinking Water Inspectorate under the Water Undertakers (Information) Direction 2004. Included in this information is an annual update on the designation of each water treatment works. The Inspectorate will use this information to update the list on or before 31 March each year.
- 3.3 Potential licensees requiring further information about the location of a water treatment works should contact the Drinking Water Inspectorate. Alternatively they should contact directly the water company concerned.
